IREB | Ethical principles

- Values that guide us -

As IREB, we are committed to a clear mission: the promotion of competence, quality and integrity in the requirements engineering and digital design community. Our ethical principles guide our actions and determine our understanding of responsibility - towards the community, our partners and society.

Our ethical principles

With the following principles, we create a reliable fundament for our work in the areas of Requirements Engineering and Digital Design. They give us orientation, promote open collaboration and ensure the trust of our community..

Creating added value

Our goal is to actively enrich the Requirements Engineering and Digital Design communities – through knowledge, exchange and quality.

Quality over profit

Sustainability and excellence are more important to us than commercial interests.

Community over self-interest

IREB's interests always take priority over individual benefits.

Fairness over tricks

Our decisions are based on integrity, not loopholes.

Transparency and freedom from conflict

Our behavior is guided by clear rules to avoid conflicts of interest.

Respecting data privacy

We protect personal data and act responsibly.

Zero tolerance of discrimination or corruption

Equality, respect and integrity are non-negotiable for us.

Respect for intellectual property

We honor the work of others and treat their achievements with respect.
